Our Services

Responsive Web Design

Our responsive website design ensures rapidly available content and images look great on all electronic devices, including mobile phones, tablets, laptops, and PCs.

Update Website Style Every 36 Months

Our innovative design solutions reflect the latest trends to keep your website looking fresh and modern. Upgrade your site every 36 months to any of our brand-new designs for free.

Royalty-Free Stock

A picture is worth a thousand words. Choose among thousands of licensed library images to enhance and define your website.

Technical Support

Enjoy peace of mind with unlimited tech support by phone and email, ensuring your online presence remains robust and hassle-free. Our dedicated team is always available to address your practice's digital marketing needs.

Dedicated Hosting

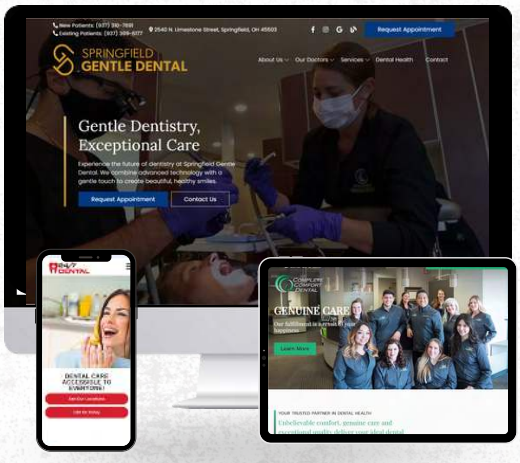

Experience reliability you can count on with 99.9% uptime through our dedicated hosting, ensuring your website is always accessible to online visitors and patients.

Unlimited Content Changes

You can make unlimited content changes to your website. Simply email us or call our support line, and we'll handle the rest. Most changes are completed within two business days.

Dedicated Marketing Representative

A dedicated marketing representative will personally manage your account and partner with you to develop results-driven strategies to get you more new patients. Getting to know your practice well, your marketing representative will constantly monitor your online success, provide daytime phone support, and send quarterly updates to keep you well-informed.

Real Time Monitoring

Never miss a review regarding your practice! With Reputation Reporting, our automated monitoring system will notify you immediately whenever a new review gets generated.

Domain Name

We handle the purchase, you hold the ownership. Available to all DoctorsInternet.com clients or bring your own domain.

ADA Compliant

Besides reflecting the latest advances in technology and design trends, every website we build is fully ADA-compliant, creating inclusive experiences while meeting all accessibility and regulatory standards.

Google Maps

With Google Maps, patients can get one-click directions to your practice, making it simple to find your location quickly.

Online Fillable Forms

Make life easier for your patients with our fillable, HIPAA-compliant registration, health, privacy, and consent forms added to your website! Once submitted online, these forms are stored on a secure, HIPAA-compliant server where you can print or keep them as PDF files.

Specialty Specific Library

A comprehensive library of conditions and treatments based on your practice establishes your website as a trusted resource for relevant healthcare information.

HIPAA Compliant Appointment & Contact Us Forms

Enhance patient communication and safeguard sensitive information with HIPAA-compliant appointment and contact forms that ensure secure, encrypted submissions. With our built-in encryption reader, your practice can confidently manage patient inquiries while maintaining the highest privacy and compliance standards.

Review Generation

Generate positive patient testimonials with custom tools and links that streamline the process and allow you to post glowing reviews on platforms patients are most likely to visit. Our system uses text messages to make it easier and more efficient to generate good reviews.

Review Responses

Responding to online patient reviews plays a role in Google's search algorithm and rankings. For this reason, we take care of the responses for you —building trust and loyalty while enhancing your practice's reputation.

Business Listings

Boost your practice's online presence by getting listed on 70 leading healthcare directories. Beyond enhancing your visibility, we'll also ensure accuracy by suppressing and locking any duplicate listings that may exist online.

Reviews Tap Stand

Now, satisfied patients can simply tap their phones or scan a QR code conveniently located in your office to access your practice's Google review page and write a quick 5-star review!

Phone Call Tracking

Quantify your website's performance by distinguishing calls directly generated by it versus ones attributable to other sources. While providing clear metrics on how well your website drives engagement, call tracking also includes a call monitoring feature to help ensure your office team provides a professional patient experience.

5 Star Review Spotlight on Facebook

We ensure your glowing reviews get seen by as many people as possible. Our team will post your 5-star reviews to your Facebook page.

Maps

Google, Bing, and Yahoo Maps provide valuable digital marketing opportunities to boost online visibility and get your practice noticed by patients actively searching for local services. Our team will manage and optimize your listings, making sure your practice information is up-to-date, complete, and positioned for success.

Web Statistics

Track and analyze your website's performance with Google Analytics integration, providing detailed web statistics on visitor traffic, behavior, and trends. These insights help you make data-driven decisions to achieve online success and attract more patients to your practice.

Search Engine Submission

Submitting your website to 25+ search engines maximizes your online visibility and ensures your practice reaches more potential patients across multipleplatforms.

Back-End Dashboard

Stay well-informed every step of the way with our customer back-end dashboard. This easy-to-use tool lets you access valuable data on your website and online marketing performance, all in one place. It also provides information on your online reviews and online forms.

Blogging

To enhance your practice's search engine optimization, our writing team creates monthly blog posts—an essential factor in Google's SEO algorithm. These posts not only improve your online visibility but also provide a platform to share valuable insights on topics relevant to both current and prospective patients, helping to build rapport and trust.

Review Postcards or Business Cards

Boost your online reputation with custom postcards or business cards delivered straight to your office—perfect for distribution to patients most likely to write your office a positive review.

Educational Videos

Educational videos further demonstrate your practice's commitment to outstanding care—providing patients with the information they need to understand specific conditions and treatments and make well-informed decisions.

Website Chat Feature

Boost patient engagement with an intuitive chat feature for instant responses and easy appointment scheduling, directly on your website.

Email Marketing Management

Monthly emails or newsletters offer a personalized, efficient, and cost-effective channel for sharing important information while fostering relationships that promote practice growth. Our digital marketing team will help you develop and send emails and newsletters designed to engage and impress.

Facebook, Google Posts, and Instagram Management

We'll create and update your social media accounts, developing custom posts to expand your practice's social media presence while engaging current patients and attracting new ones.

Question Query & Voice SEO

With more people typing questions online and using voice-activated search devices like Amazon Alexa, tailoring and regularly updating your website with question-based and voice-related SEO techniques is critical for staying ahead. We blend AI's precision with human expertise to continually adapt your website's backend code and achieve the best search placement results.

Paid Add-On Services

Google Ads and Bing Ads

Get your practice's ads prominently featured on search engine results pages the moment a prospective patient seeks information and care! An expert team will customize and manage your PPC ad campaigns—employing meticulously researched keywords, locations, and user behavior to target local audiences. Immediate and guaranteed search placement.

Facebook and Instagram Ads

Target and reach an ever-widening circle of prospective patients based on collected demographic data that influences their choices in care! Placing ads on these popular social media platforms is perfect for raising awareness, showcasing services, and engaging with patients in their favorite online spaces. Have your ads display on Instagram and Facebook in the zip codes of your choosing.

Email Capture

Use this valuable marketing tool to capture the email addresses and names of people who have visited your website but have taken no further action. We'll help you immediately reach out and build a relationship through targeted email campaigns designed to convert online visitors into new patients.
